# GOVERNMENT OF INDONESIA AND PLN WITNESS RENEWABLE ENERGY LEADERSHIP IN CALIFORNIA

From March 26 to March 31, 2017, in collaboration with the U.S. Energy Association (USEA), USAID Indonesia supported 14 senior officials from Ministry of Energy and Mineral Resources (MEMR), National Planning Agency (Bappenas), and State Electricity Company (PLN) to visit Northern California in the United States. The Government of Indonesia's senior official learned how the government, utilities and other key organizations in California implemented plans and supported programs to achieve progressive targets of up to 50 percent of renewable energy by 2030.

In California, renewable energy (excluding large hydropower) has already reached 27 percent. The Indonesian delegates gained exposure on latest developments, technologies, and best practices in renewable energy.
